EDUCATION

University of St Andrews

Aug. 2024 – Jun. 2028 (expected)

BSc (Hons) Computer Science — on track for a 2:1

St Andrews, GBR

- **Relevant modules:** Data Structures and Algorithms, Systems Programming and Logic, Networking and Web Development, Unix Systems, Object-Oriented Programming

George Watson's College

Jun. 2024

SQA Advanced Highers & Highers

Edinburgh, GBR

- **Advanced Highers:** Computing Science (A, school prize), Business Management (A)
- **Highers:** English (A), Mathematics (A), Computing Science (A), Business Management (A), Accounting (A)

PROJECTS

SkiteScore | *Live Scottish football statistics* | *React, Vite, Tailwind, Vercel Functions, Redis* | *skitescore.com*

- Built and deployed a single-page app for live scores, tables and player stats, with polled updates and URL-driven state for shareable links
- Wrote a serverless proxy keeping provider credentials server-side, combining Redis and CDN caching with request de-duplication to cut upstream API calls
- Implemented league-specific logic: post-split table, live 'as-it-stands' standings and points deductions

Expression Quest | *CS2006 group project, 20/20* | *Haskell*

- Built a terminal arithmetic puzzle game with a hand-written monadic parser combinator library, handling precedence, associativity and parentheses via a context-free grammar
- Implemented a brute-force solver over permutations of the operand multiset, exploiting lazy evaluation so expression trees are only materialised until a match is found

Ticket Chief | *CS2003 coursework, 18/20* | *Java, JavaScript, HTTP, REST*

- Built an HTTP/1.1 server in Java from scratch, parsing raw requests and routing to a REST API
- Prevented overselling under concurrent load with synchronized methods on a singleton store and ConcurrentLinkedQueue, and signed issued ticket IDs with HMAC-SHA256 so forged IDs fail verification

EXPERIENCE

Menzies Aviation (Lufthansa Group)

Jun. 2025 – Present

Passenger Services Assistant

Edinburgh, GBR

- Handled check-in and boarding for passengers, navigating reservation software to manage flight manifests
- Resolved logistical challenges during flight disruptions by rapidly processing rebookings and de-escalating concerns

George Watson's College

Jun. 2023 – Aug. 2023

Summer IT Intern

Edinburgh, GBR

- Deployed and configured campus-wide IT infrastructure, including Macs, PCs, iPads, and networking hardware
- Administered MDM software to control, update, and provision hundreds of devices across the enterprise network
- Resolved complex hardware and software issues under tight deadlines to minimise technical downtime

SKILLS AND INTERESTS

Technical Skills : Java, Python, Haskell, JavaScript, React, Node, HTML/CSS, SQL, Git, Unix, Bash

Interests : Pipe Band & Snare Drumming (2024 World Champions, various other band and solo wins); golf, football, music, cooking
